DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06 February 2004 has been entered.

Specification

2. The specification is objected to as documents have been improperly incorporated by reference; see page 9, lines 9-10, and page 14, last paragraph. The specification does not identify with detailed particularity what specific material is being incorporated from each of the documents and where that material is to be found in each of said documents. As set forth in

Advanced Display Systems Inc. v. Kent State University (Fed. Cir. 2000) 54 USPQ2d at 1679:

Incorporation by reference provides a method for integrating material from various documents into a host document--a patent or printed publication in an anticipation determination--by citing such material in a manner that makes it clear that the material is effectively part of the host document as if it were explicitly contained therein. *See General Elec. Co. v. Brenner*, 407 F.2d 1258, 1261-62, 159 USPQ 335, 337 (D.C. Cir. 1968); *In re Lund*, 376 F.2d 982, 989, 153 USPQ 625, 631 (CCPA 1967). **To incorporate material by reference, the host document must identify with detailed particularity what specific material it incorporates and clearly indicate where that material is found in the various documents.** *See In re Seversky*, 474 F.2d 671, 674, 177 USPQ 144, 146 (CCPA 1973) (providing that incorporation by reference requires a statement "clearly identifying the subject matter which is incorporated and where it is to be found"); *In re Saunders*, 444 F.2d 599, 602-02, 170 USPQ 213, 216-17 (CPA 1971) (reasoning that a rejection or anticipation is appropriate only if one reference "expressly incorporates a particular part" of another reference); *National Latex Prods. Co. v. Sun*

Art Unit: 1634

Rubber Co., 274 F.2d 224, 230, 123 USPQ 279, 283 (6th Cir. 1959) (requiring a specific reference to material in an earlier application in order to have that material considered a part of a later application); *cf. Lund*, 376 F.2d at 989, 13 USPQ at 631 (holding that **a one sentence reference to an abandoned application is not sufficient to incorporate from the abandoned application into a new application**). (Emphasis added.)

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 7, 9-14, 16, and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5,952,172 (Meade et al.).

5. Meade et al., teach at length a method of detecting nucleic acids whereby transition metal-ligand complexes are attached to a probe that in turns hybridizes to a target nucleic acid acid. At column 7, an extensive list of both suitable transition metals and their ligands is provided. Column 7, lines 52-53, teach that ruthenium and osmium are particularly preferred (limitations of claims 9 and 18). At column 8, bridging to column 9, Meade et al., discloses use of an electrode or electrical potential so to cause the transition metal-ligand complex to emit light that is in turn detected.

6. Meade et al., column 9, lines 45-54, teach providing metal ions, e.g., cobalt and nickel. Meade et al., at column 10, first paragraph, teach using complexes of ferrocene and Os(bpy)₂ molecules.

Art Unit: 1634

7. For the above reasons, and in the absence of convincing evidence to the contrary, claims 7, 9-14, 16, and 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5,952,172 (Meade et al.).

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
